

MODEL OVERVIEW

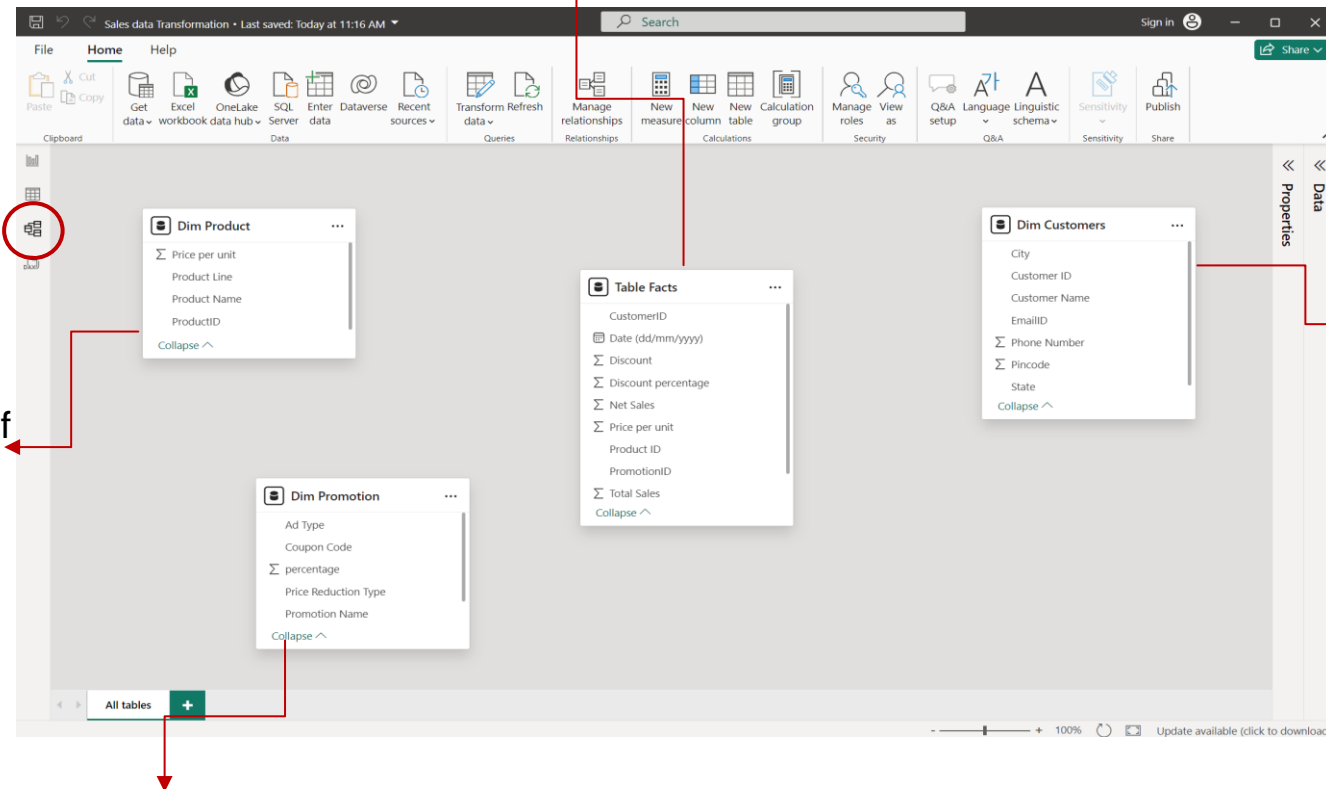

- Our fact table is at the ready.

- I'm simply going to click here on this model view first.

- we have the table of product dimensions.

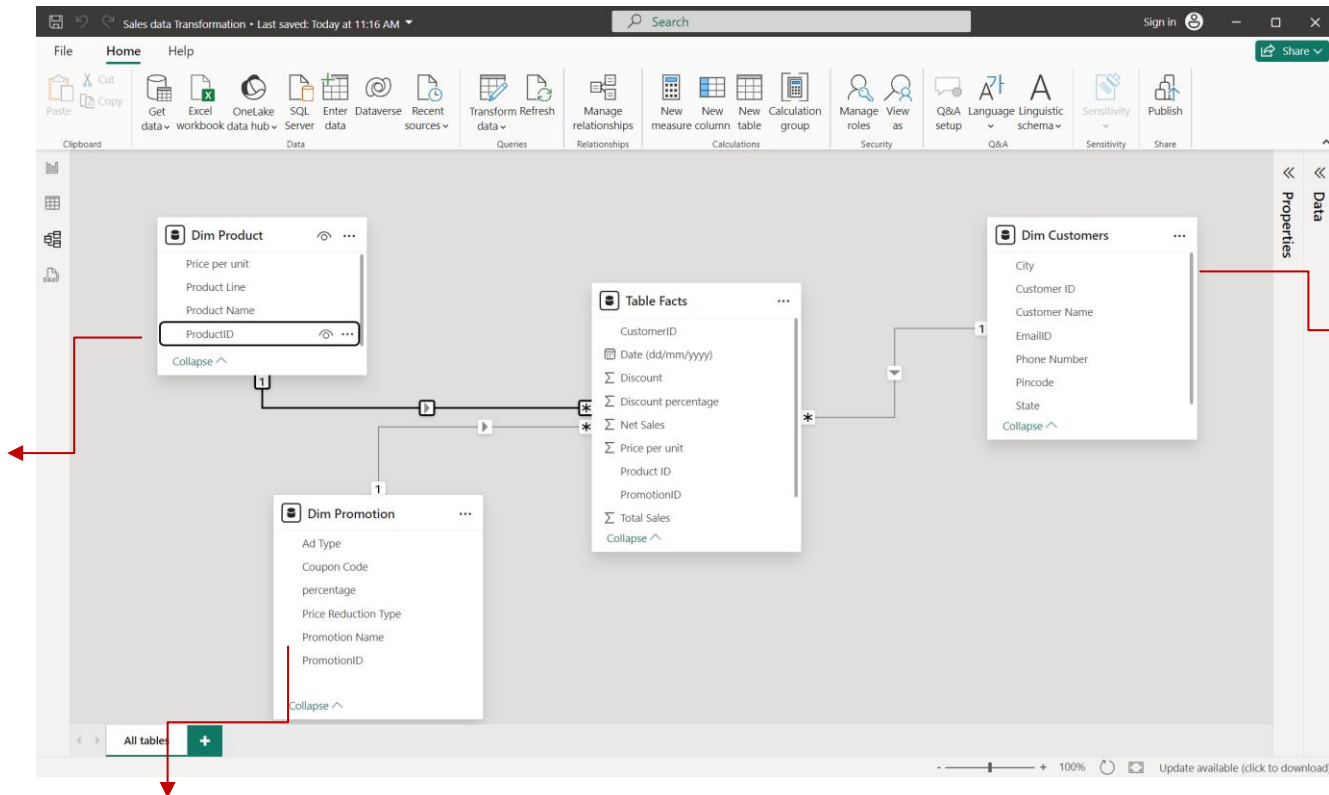

- Our customer dimension table is available.

- Dimension promotion is here.

MODEL OVERVIEW

- Create a relationship between the “Fact” and “Product” tables using the shared `product ID` column.

- The “Table Facts” and “customer dimension” table share a customer “ID column”, enabling a relationship between them.

- A relationship can be created between the “Table Facts” and the “Promotion dimension” table using the shared “Promotion ID” column.
